THEME(S): Treating Electric Shocked Eagle

Animal

Eagle with unknown age, but because of the size it must be a younger one.

Summary

The first bird has arrived, and not just any bird - he's an eagle. We are very keen for him to get well, we are excited for him.

We'd love to have him back, we're excited for him. When Dr Somogyi Rita (AlphaVet) called, about a shocked eagle and what program to give it we decided to do a new order of therapy programs. Also in Human treatment, we never had a electrocuted person before but we want look into it.

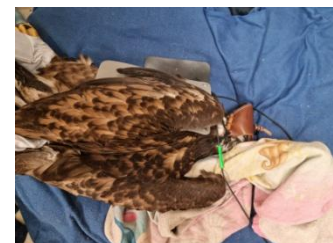

Since starting, the Eagle has been receiving daily treatment. Because of big successes with each treatment we did continuing the VETCORE treatment.

History

An eagle was electric shock, but also had lead in his stomach. Usually the eagle's legs and wings have to be cut off, the leg will not survive, but it can still live without the wing. They will write this case, and the person who will write it is a bird specialist doctor because she was brought from a bird sanctuary for treatment.

31.05.2023 1st treatment with VETCORE

- | | |
|----------|--|
| 108 | Pretreatments in states of exhaustion |
| 112 | Pre-treatment acc. to Dr. Herrmann |
| Bioph. A | Post-traumatic anxiety |
| Bioph. H | Excessive demand |
| 112 | Pre-treatment acc. to Dr. Herrmann |
| 105 | Therapy preparation adolescent |
| 117 | Pain treatment |
| 1183 | VET energy circuit endocrine system (-ose) |
| 1187 | VET energy circuit heart (-ose) |
| 1189 | VET energy circuit circulation (-ose) |
| 1180 | VET energy circuit spleen-pancreas (-itis) |

- 135 Metabolic disorder
- 133 Lymphatic system treatment

Comments: The treatments started with closed eyes
Small flexible electrode under the wing and
and the belly.

02.06.2023 2nd treatment with VETCORE:

- 104 therapy preparation junior
- 108 Pretreatments in states of exhaustion
- Bioph. A Post-traumatic anxiety
- Bioph. H Excessive demand
- 113 Pre-treatment acc. to Dr. Morell
- 114 Basic therapy acc. to Dr. Morell [Hypo]
- 117 Pain treatment
- 128 Stimulation immune system
- 1183 VET energy circuit endocrine system (-ose)
- 1187 VET energy circuit heart (-ose)
- 1191 VET energy circuit lungs (-ose)
- 149 Scar suppression
- 2000 Individual program HDbar
- 133 Lymphatic system treatment

03.06.2023 3rd treatment with VETCORE:

- 104 Therapy preparation junior
- 112 Pre-treatment acc. to Dr. Herrmann
- 113 Pre-treatment acc. to Dr. Morell
- Bioph. A Post-traumatic anxiety
- 117 Pain treatment
- 128 Stimulation immune system
- 135 Metabolic disorder
- 149 Scar suppression
- 1183 VET energy circuit endocrine system (-ose)
- 1187 VET energy circuit heart (-ose)
- 1180 VET energy circuit spleen-pancreas (-itis)
- 1190 VET energy circuit liver (-ose)
- 2000 Individual program HDbar
- 133 Lymphatic system treatment

Comments: here he turned away, shaking his head, restless jumped on his stick, sat down,
started eating, knows what's happening, no more dizziness.

04.06.2023 4th treatment with VETCORE:

- 104 Therapy preparation junior
- 112 pre-treatment acc. to Dr. Herrmann
- 113 pre-treatment acc. to Dr. Morell
- Bioph. A Post-traumatic anxiety

- 117 Pain treatment
- 128 Stimulation immune system
- 135 Metabolic disorder
- 149 Scar suppression
- 1183 VET energy circuit endocrine system (-ose)
- 1189 VET energy circuit circulation (-ose)
- 1180 VET energy circuit spleen-pancreas (-itis)
- 2000 Individual program HDbar
- 133 Lymphatic system treatment

Comments: The eagle is already moving towards the end, spreading its wings, struggling to get away.

09.06.2023 they couldn't bring him here anymore -he refused to go for treatment :-), because he was so well. He jumps up to 20-25 cm, sits a lot, his wings and legs are fine.

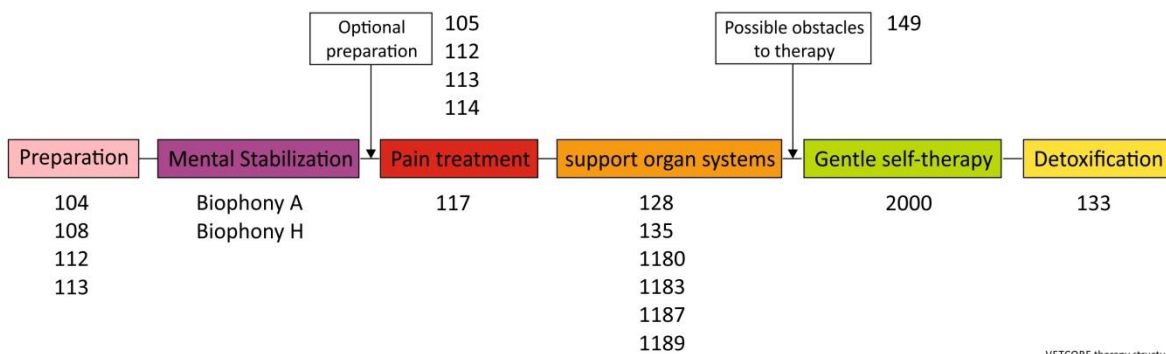

11.06.2023 The eagle eats normally and no other abnormalities are noticeable

•••••

Thoughts: In first treatment there was a therapy preparation for adolescent animals. But we changed them at second therapy to a more soft one (junior).

All therapies follow the same pattern

- a) Therapy preparation
- b) Mental stabilization and processing of the shock
- c) Optional second preparation
- d) Pain treatment
- e) Support of the organ systems (mainly cardiovascular, which were affected by the electric shock) via the energy cycle programs
- f) Try to avoid/cure possible obstacles by scars
- g) Gentle self-therapy
- h) Detoxification via the lymphatic system
